

## Learning Objective

### Objectives

1. Get to know the application.
2. Match letter to sound
3. Match sound to letter
4. Score at least 80% on assessment.
5. Increase parent / guardian involvement in application use.

### Definition

Students will learn and associate the correct sounds for each letter A-Z.

### Success Criteria

Accurately match each letter to its corresponding sound within the app activities with 95% accuracy.

### Materials

1. AI Literacy App: Utilizing an app that assumes no literacy skills, adaptable to various learning levels, and includes interactive activities and assessments.
2. Tablet/Computer: Device for each student to access the AI literacy app.
3. Headphones: For individual sound clarity during sound recognition activities.
4. Letter Flashcards: Virtual letter cards for reinforcement activities.
5. Alphabet Chart: Visual representation of the alphabet (on the wall) for reference.

### Learning Activities

1. Introduction to the application (Objective 1)  
Activity 1.1: App Exploration  
Students will explore the AI literacy app's interface and interact with the letters A-Z.
2. Letter-Sound Association  
Activity 2.1: Interactive Sound Matching  
Students will engage with app activities that involve matching letters to their corresponding sounds. (Objective 2)  
Students will listen to different letter sounds and select the matching letter from a group.  
Activity 2.2: Sound Association Games (Objective 3)  
Through the app, students will play games involving associating sounds to objects whose names start with the corresponding letters, reinforcing sound-letter associations.
3. Assessments and Reinforcement  
Assessment 3.2: Sound Association Assessment (Objective 4)  
The app will assess students on their ability to associate sounds with the corresponding letters accurately.  
Immediate app feedback and additional reinforcement activities will be provided based on individual student needs.

#### 4. Homework/Additional Practice:

##### Activity 4.1: Home Exploration

Encourage students to explore the AI literacy app at home and practice recognizing letters and their sounds. (Objective 5)

##### Activity 4.2: Parent/Guardian Involvement (App will capture parent attendance data)

Encourage parents/guardians to engage in letter recognition and sound association activities with their children using the alphabet chart and online resources.

#### Evaluation

The success of the learning plan will be evaluated based on students' performance on app assessments, their ability to recognize letters and associate them with sounds in and out of app context, and their engagement and progression within the app.

Individual student progress will be monitored, and additional support and modifications will be provided as needed to ensure that each student meets the learning objectives.

This learning plan ensures a structured yet flexible approach, allowing students to learn at their own pace and providing continuous support and reinforcement to build a strong foundation in letter recognition and sound association.
